

# SEMI-AUTOMATIC TABLETOP STRAPPING MACHINE TC-01

Our semi-automatic strapping table is the ideal solution for companies that handle a few boxes per day. Designed for polypropylene strapping, it offers an excellent balance between performance and cost.

- Electronic outside tension control
- Adjustable cooling time
- Energy-saving motor, operates only when the strap is inserted
- Safety switch for service and maintenance
- Single motor without clutch, belt or chain

## SPECIFICATIONS

| MACHINE             |                                                               |
|---------------------|---------------------------------------------------------------|
| Dimensions          | Length (L): 784 mm<br>Width (W): 546 mm<br>Height (H): 780 mm |
| Weight              | 53 kg                                                         |
| Strap tension       | 1 - 55 kg   2.2 - 121.3 lbs                                   |
| Speed               | 1 meter per second                                            |
| Table height        | 780 mm (adjustable table height in option)                    |
| Noise emission      | 75 dB                                                         |
| Ambient temperature | 5 °C - 40 °C                                                  |
| POWER SUPPLY        |                                                               |
| Energy consumption  | 0.2 kW                                                        |
| Amperage            | 1.8 Amps                                                      |
| Voltage             | 110 V                                                         |
| Frequency           | 50/60 Hz                                                      |
| Type of current     | AC- single phase                                              |
| STRAP               |                                                               |
| Width               | 5 - 15.5 mm (adjustment required)                             |
| Thickness           | 0.45 mm - 0.70 mm                                             |
| Coil                | Diameter: 8" (9"-16" optional), Width: 8"                     |
