

	ANGLEGUARD GENERAL SPECIFICATION	ID #	F-13.3-009E
		VERSION	3
	REMARK : REPERTORY 13.3 OF THE APQC	VERSION DATE	2024-04-04

Composition

- 100% recycled paper
- Water based glue to hold the layers
- For indirect contact with food
- Full wrap (the outside full covering ply) can be brown, white, or printed.

Corner Edge property			
Reference	Property	Minimum	Maximum
B	Thickness	-6%	+6%
A	Leg width (in)	-0.125	+0.125
	Leg width (mm)	-3.18	+3.18
D	length (in)	-0.125	+0.125
	length (mm)	-3.18	+3.18
C	Angle (deg)	82	98

Disclaimer and Recommended Warehousing Conditions for Northrich's protective packaging solutions:

To ensure the highest satisfaction and performance of our protective packaging solutions, please be aware of the following:

1. **Industry Standard Tolerances:** Due to the inherent characteristics of paper products, which are sensitive to environmental conditions such as moisture and temperature, exact dimensions without tolerances cannot be guaranteed. It is a recognized industry standard to apply tolerances to all specifications to accommodate the natural behaviors of paper materials.
2. **Recommended Storage Conditions:** To preserve the integrity and quality of our products, we recommend storing them in an environment with stable conditions: a temperature maintained between 20–26°C (68–79°F) and a relative humidity level kept within a 30% to 50% range. These conditions help mitigate the potential for product expansion or contraction and support optimal product performance.
3. **Quality Assurance Period:** The quality of our products is guaranteed for a period of up to 3 months from the date of delivery, under the recommended storage conditions. Beyond this period, we cannot ensure that the product quality will remain as specified, due to the potential impact of varying storage conditions over time.
4. **Customer Responsibility:** While we take pride in the quality and consistency of our products, it is important to note that we do not have control over the storage and warehousing conditions at our customers' locations. As such, adherence to our recommended environmental conditions is crucial for maintaining the product's quality and performance.
5. **Custom Specifications and Tolerances:** We understand that some projects may require customized specifications or tighter tolerances. We are committed to meeting our customers' needs to the best of our ability. Please feel free to discuss your specific requirements with us, and we will explore what accommodations can be made to fulfill your project needs.
