MALODOR ELIMINATION

The Odor Eliminator is a high-performance biotechnological solution designed to eliminate odors at their source, both in the air and on textiles. Unlike traditional deodorizers, it does not simply mask odors: it targets their origin directly using a microorganism-based technology.

Its formula contains active microorganisms that specifically break down the organic matter and proteins responsible for unpleasant odors, ensuring a long-lasting and effective action. It is safe to use and ideal for indoor environments.

Versatile, this product deodorizes and refreshes textiles while also providing stain-removing action on organic soils. It leaves a pleasant wild berry fragrance, creating a naturally fresh sensation.

Suitable for a wide range of applications: commercial spaces, institutions, hotels, vehicles, offices, and residential areas

INGREDIENTS

Water, Organic extracts, Fragrance

pH:7.0
Aspect:Slightly hazy liquid
Odor:Wild berries
% voc:< 1%

- Certified non-toxic for the environment
- Biodegradable (in accordance with OECD test No. 301D or equivalent)
- Non-carcinogenic
- Phosphate & NTA free
- Dye and formaldehyde free

MODE D'EMPLOI

TO DEODORIZE THE AIR: Spray into the air.

TO DEODORIZE TEXTILES: Lightly dampen the textile to be deodorized. Spray the product directly onto the surface to be treated.

TO REMOVE STAINS: Test on a hidden part of the fabric to be treated. If the stain is fresh and still damp, remove the excess by blotting. Apply the product generously directly onto the stained area, saturating it. Lightly rub, allow the product to work for several minutes and then dry. No rinsing is necessary.
